

Illustrated Talks by Dave Hassell

6 talks are available and each last for about 90 minutes but can be adapted to different lengths if required. They are presented by 2 Leitz projectors using infra-red, remote controlled dissolve equipment to prevent blackouts between slide changes. A wireless PA system and an 8 ft by 8 ft framed screen are available for halls or large rooms if required.

On the Texas Trail

130 colourful and spectacular species are shown including Hooded Oriole, Vermilion Flycatcher, Summer Tanager, Painted Bunting, Green Jay, Pyrrhuloxia, Curve-billed & Long-billed Thrashers, Great Kiskadee, Harris's Hawk, Crested Caracara and Plain Chachalaca.

Flydrive the USA

More close-ups of colourful North American birds but this time from Florida to California and other States. Birds from the Everglades, Californian deserts, Yosemite National Park and more, right up to the Sierra Nevada Mountains are included.

A Miscellany of Birds

A look at a wide variety of birds from different habitats from all parts of Britain. Stone Curlew, Little Ringed Plover, Barn & Little Owl, Green Woodpecker and many others.

British Seabirds

24 species of seabirds regularly breed in Britain and nearly all of them are covered ranging from Cormorant, Shag and Gannet to gulls, skuas, both the guillemots, Razorbill, Puffin, Fulmar and most of the terns.

The Breeding Birds of Shetland Part 1

Close-up views of the breeding activities of most of the terrestrial species including waders together with a couple of seabirds.

The Breeding Birds of Shetland Part 2

*An **entirely separate** talk from **Part 1** with the remaining seabirds and other species associated with the sea.*
